

Who We Are

Wyncode Academy is a development boot camp immersing ambitious individuals in a demanding and inspiring learning environment engineered to develop successful coders with business acumen.

We believe in promoting programming literacy using a disruptive education model and feel that a boot camp environment is the best way to learn practical and relevant coding skills quickly.

Wyncode Academy separates itself from other coding bootcamps by focusing on teaching coding skills and the business and leadership skills you need to succeed, whether you plan to start your own company or work for an established one.

CLASSES OFFERED

The **Immersive Web Development** course is a nine-week coding boot camp that teaches students the five most used coding languages: Ruby, Rails, JavaScript, CSS and HTML.

The course is open to all students, from beginners to advanced. At the end of the course, students present a finished web application that showcases what they learned.

The **iOS** Development course will give you the skills needed to develop your own iOS apps, from inception to deployment to Apple's App Store. The course is developed and taught by Miami tech and iOS veteran Karl Goodhew, the Director of Development at YellowPepper.

This course is open to students who have either completed the Immersive Web Development course, or can demonstrate a similar level of proficiency.

Node.js is an event-driven, server-side JavaScript environment used by Microsoft, Ebay, Yahoo, and many more top tech companies Wyncode's Node.js development course will give you the skills needed to develop your own Node applications. The course is taught by Sean Canton, Lead of Technical Research at Rokk3rLabs.

This course is open to students who have either completed the Immersive Web Development course, or can demonstrate a similar level of proficiency.

Common Questions

Will learning to code help me find a job?

During the course, you will get help preparing your resume and Github account so that you stand out from the crowd. You will have the chance to network with companies that are in Miami and we will host a hiring week at the end of the course where you will meet and be interviewed by companies.

What kind of commitment does Wyncode Require?

To truly succeed, students regularly put in more than a normal days work and some choose to work even harder. What you put in is what you get out, so we recommend not working or studying elsewhere while you are in the program.
